

Control 8 or 16 computers cost effectively

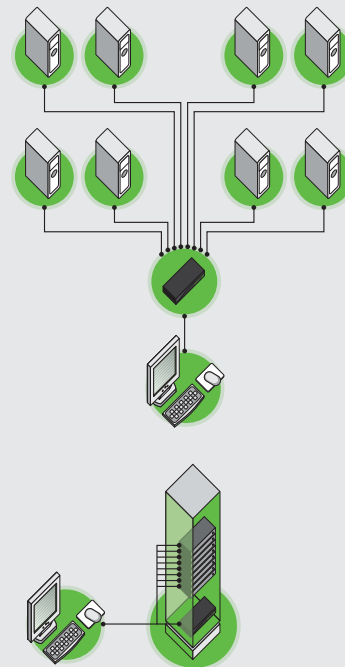

Switch easily between PCs using the OSD menus, simple keyboard commands or the select button on the SCOUTosd's front panel. For problem-free operation, high quality keyboard and mouse emulation allows for simultaneous booting and eliminates computer lock-ups that could otherwise occur without a direct connection to keyboard and mouse.

- ▶ 8 and 16 port kvm switch with a user-friendly OSD menu
- ▶ 19" rackmountable
- ▶ Video resolution 1920 x 1440 with excellent video transfer quality
- ▶ PS/2 Keyboard and mouse connector interface
- ▶ Select Push-button, keyboard Hot Key or OSD control
- ▶ Quick and easy installation

KVM Server Management

SCOUT8 & 16

The SCOUT8 or 16 is compatible with PS/2 style computers. It has keyboard and mouse emulation for error free boot-ups and supports a wide variety of mice. The SCOUT supports high resolution of 1920 x 1440 without any deterioration of the image quality. Switching between PCs can be accomplished in three ways: through keyboard hot key commands, by using the convenient front panel selection buttons or through the OSD (On Screen Display).
