

Compact direct access

Only 1U high the RackAccess is the ideal solution for efficient server management directly at the rack. Choose the model to optimally suit your needs: with 15" or 17" 19" LCD screen, with or without integrated 8 or 16 port KVM switch.

- ▶ Rack mountable keyboard, video, mouse (KVM) console
- ▶ Contains an LCD colour monitor, keyboard and touch pad mouse
- ▶ Available with integrated 8 or 16 port multi-platform kvm switch with UTP / STP cabling or over IP
- ▶ Takes only one unit (1U) of rack space
- ▶ Improved security: lockable access version available
- ▶ Offers huge space savings over a standard console

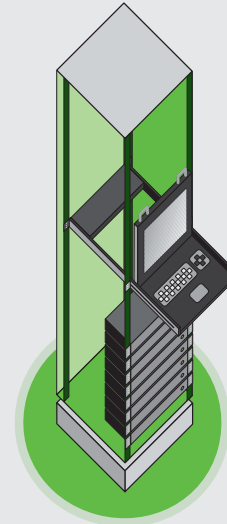

KVM Server Management

RackAccess

RackAccess allows direct access at the server rack, saving space and heat. The rapid growth of computer networks and network servers, shortage of IT staff and limited office space put a constant strain on today's administrators.

RackAccess is a rackmountable keyboard, video and mouse (KVM) console with the capability of integrating a KVM switching system. This troublefree KVM console contains an LCD monitor, a standard keyboard, as well as a touch pad mouse. The KVM drawer occupies only one rack unit (1U) and therefore conserves valuable rack space.

In conjunction with an analog or digital KVM switch, the RackAccess console can allow low-profile access to almost any number of desired computers. RackAccess 8i and 16i save even more space having an 8 or 16 port Daxten KVM switch integrated in the same 1U.

Product Features

- ▶ LCD display 15", 17" or 19" LCD Active matrix
Resolution up to:
 - 15"-Display: 1024 x 768 @ 75 Hz
 - 17"-Display: 1024 x 768 @ 75 Hz
 - 19"-Display: 1280 x 1024 @ 75 Hz
