

# Voyager

KVM EXTENDER

## So far – So good

The Voyager KVM Extender enables you to move your keyboard, monitor and mouse up to 300m (1,000ft) away from your PC using just a single CAT 5 cable.

- ▶ Outstanding video quality: supports up to 1600 x 1200 resolution
- ▶ Utilises one standard CAT 5 or CAT 6 cable
- ▶ Dual screen, serial, audio and SUN versions available
- ▶ Can be used with a KVM switch for extended control of multiple computers
- ▶ Ideal for banks, trading rooms and other critical locations. Place your computers in security rooms, server racks or simply away from hostile environments.

## Voyager KVM Extenders

Use the Voyager to extend your KVM signals up to 300m over CAT 5/6 cable. Compact and powerful, the Voyager KVM extenders utilise standard structured cabling (CAT 5/6 UTP/STP), reducing installation time and costs. No additional software is required. The local unit is powered via the PC's keyboard port eliminating the need for an external power supply. Even at 300m, the Voyager 300 delivers high quality video. Different versions are available to allow for serial devices, touchscreens, dual video screens or SUN computers to be extended as well.

For highest quality video resolution up to 125m use the Voyager 125H.

For serial and touchscreen applications the VoyagerTouch 60, 125H and 300 are the ideal solution.
