RackAccess

KVM CONSOLE

RackAccess allows direct access at the server rack, saving space and heat.

The rapid growth of computer networks and network servers, shortage of IT staff and limited office space put a constant strain on today's administrators. RackAccess is a rackmountable Keyboard, Video and Mouse (KVM) console with the capability of integrating a KVM switching system. This trouble-free KVM console contains an LCD monitor, a standard keyboard, as well as a touch pad mouse. The KVM drawer occupies only one rack unit (1U) and therefore conserves valuable rack space. In conjunction with an analog or digital KVM switch, the RackAccess console can allow low-profile access to almost any number of desired computers.

Technical specifications

- ▶ LCD display 15.1" TFT Active matrix
- ▶ Resolution max. 1024x768 @ 75Hz
- ▶ Max. 16 million colours (Dithering)
