## Using the SCOUTkvm

The SCOUTkvm provides two possibilities to select the desired computer. You may use either the Select button on the unit, or make use of the keyboard Hot Key commands.

You may notice that the mouse cannot be used for around 2 seconds when the SCOUTkvm switches to another computer. This is normal and is caused by the synchronization process which ensures that the mouse operates correctly.

## Selection buttons

4 Port: Pressing the individual PC buttons will switch the signal to the desired computer.

## Keyboard Hot Key commands
